

James Fisher and Sons plc
Marine Services Worldwide

PACKAGED SUBSEA SOLUTIONS

Our capabilities

Fisher Offshore is a part of James Fisher and Sons plc, a leading service provider in all sectors of the marine industry, and a specialist supplier of engineering services to the UK and overseas.

We have a comprehensive range of quality marine and offshore equipment for hire and sale, equipment deployed to work on projects for our key clients and emerging customers globally.

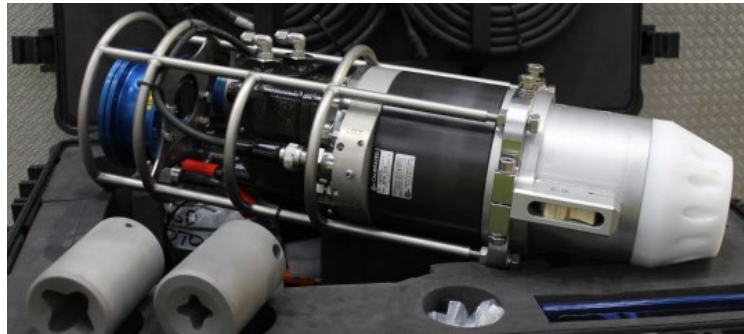

Fisher Offshore is the ideal choice for your global equipment needs in the offshore, subsea and marine industries. Boasting an extensive range of winches, cranes, subsea tooling and deck equipment coupled with service technicians and offshore personnel, Fisher Offshore has the solution for you. Whether you are undertaking an EPIC, SURF or maintenance scope, either topside or subsea, Fisher Offshore provide a fully integrated solution to your back deck requirements. Reducing port calls, people on board, footprint and paperwork, supported by experienced project management and engineering teams Fisher Offshore will ensure smooth project execution using the best equipment for the job.

ROV & Diver Tooling

With a dedicated tooling workshop and team, unrivaled levels of stock, Fisher Offshore have the resources to ensure your project requirements are met timeously and are fit for purpose.

Debris Removal

With the ever increasing advances in offshore technology and the requirement for more subsea infrastructure, Fisher Offshore has taken the initiative to invest in specialised tooling to assist with debris removal including boulder, ordnance, sand and sediment clearance.

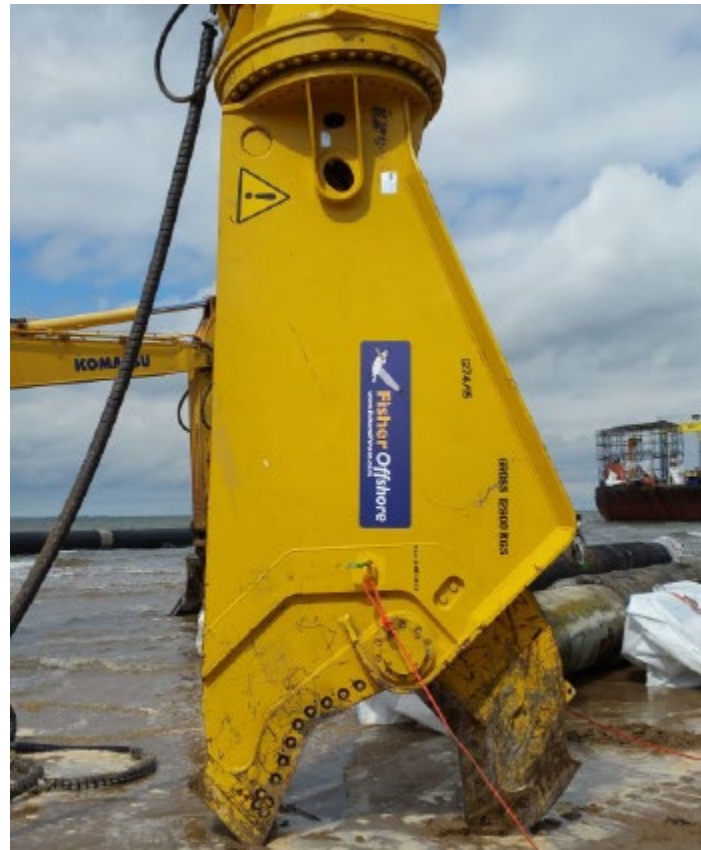

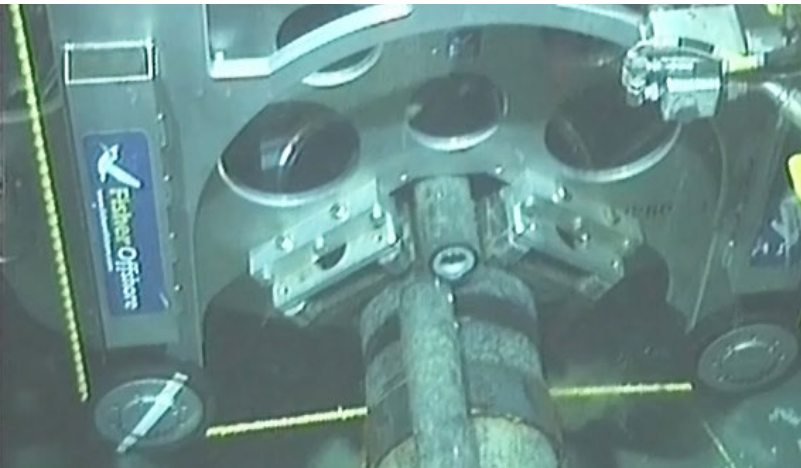

- Boulder and grapple grabs
- Subsea baskets (debris, riser and pipeline)
- Dredge units (4-10")
- Tooling deployment systems (including LARS, cranes)
- Coating removal

Cutting Solutions

Fisher Offshore's experience in supplying cutting solutions, suitable for both topside and subsea, ensure our capabilities meet operators requirements and can complete the scope effectively, swiftly and safely. Everything from cutters to shears, diver and ROV operated, we have the solution for your decommissioning and IRM project requirements.

- Diamond Wire saw
- 800Te & 1950Te shear
- Cutters
- Reciprocating saws

Engineered Solutions

Fisher Offshore have the ability and resources to not only design and build, but fully proof test new concepts for this ever evolving and demanding market.

We will work with you to offer technical and engineering services for any project requirement; from concept design to the delivery of complete turnkey projects.

A Smarter Complete Back Deck Solution
