

# National Sea Crane

The National Crane comes complete with skid assembly suitable for deck mounting and a 22kW electric safe area HPU mounted on grillage. The fitted winch is capable of lifting 1te at max outreach.

This marine crane is built to provide long time operation against harsh marine environments. All piston rods are made from Nikrom 350 with stainless steel pipes and fittings as standard.

Adapted for extended umbilical 'golden gate' diving, increasing the outward excursion of the diver from DSV to the worksite.

National Sea Crane	
Winch lifting capacity	1te at all angles
Maximum outreach	17mtr
Slewing angle	375°
Controls	Local
Recommended pump capacity	60 l/min
Max. working pressure	110 bar
Weight of crane + skid	4200kg
