Hydraulic Technician

James Fisher Offshore (JFO) is looking to recruit an experienced, dependable and proactive hydraulic technician to work from its facility in Oldmeldrum, Aberdeenshire.

The remit will be to carry out the full cycle of servicing, maintenance and repair of hydraulic equipment to a high standard, allowing the JFO team to achieve delivery deadlines.

Under general supervision they should carry out basic troubleshooting, maintain, diagnose and repair a variety of equipment including; Subsea tooling, diesel engines, hydraulic winches, high pressure pumps, centrifugal pumps, knuckleboom cranes, air compressors and hydraulic systems.

The ideal candidate will be responsible for ensuring all duties are performed in a safe, efficient and effective manner.

An engineering qualification with previous experience is essential. There may be a requirement for offshore operations and previous offshore experience, with valid offshore survival and medical certificates would be an advantage.

This is an excellent opportunity with a competitive rate of pay and long term benefits.

We are looking for the right people – mirroring our company values, we would like people who are progressive, visionary and respectful. We invest in our employees and empower them to develop themselves and their careers whilst experiencing the challenges, rewards and opportunities in working for one of the world's leading service and equipment suppliers to the decommissioning and IRM sector.

If you have the skills and drive to work in this environment, please email your CV and details to w.mclean@fisheroffshore.com
