

Spitznas Hydraulic HD25 Drill

The HD25 drill is a medium weight SDS Plus Hammer Drill suitable for drilling in concrete or masonry.

The hammer action can be switched off, making the tool also capable of drilling in wood and steel when fitted with a standard chuck via an adaptor. When the hammer action is switched off the

HD25 is capable of core drilling diameters of up to 100mm. Drilling capacity in concrete with standard SDS drill bits is 25mm. This tool features a D-handle and large multi-positional assist handle which makes it easier to manoeuvre than a pistol drill. The HD25 also comes complete with a depth gauge attachment. This tool is primarily for underwater

Spitznas Hydraulic HD25 Drill	
Capacity	Up to 25mm (1")
Blows Per Minute	4,460 Bpm
Flow Range	15–45 l/pm
Maximum Flow	50 Litres Per Minute
Pressure	80–100 Bar
